

As Far As I Can I See

A knit hat and coffee cup
Headphones on a light in your eyes
Mid-November
When you can see your breath

Take all your golden memories
Sort through them all to find what you need
Just remember
The most beautiful things

So close your eyes and feel the bright lights
When you think about it
Everything's alright
As far as I can see

Just a moment that passes through
The flicker of a crooked grin
Smooth stones
Feel the rushing river

So toss out all your worn photographs
It's time for a brand new love
Start out alone
Just until the chorus grows

So close your eyes and feel the bright lights
When you think about it
Everything's alright
As far as I can see

And hope, hope,
It grow, grows
And hope, hope
It show, shows
And it shows on your face
And in every place you go

So close your eyes and feel the bright lights
When you think about it
Everything's alright
As far as I can see
